Luigi Bocconi

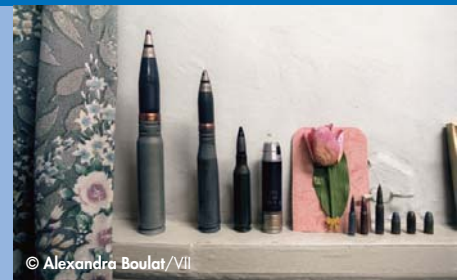

A project by

Fondazione
Umberto Veronesi
PER IL PROGRESSO DELLE SCIENZE

*“We all can contribute to peace building.
This is why I decided to commit myself to Science for Peace,
a project in which I firmly believe and that becomes more and more
relevant day after day.
Since 2009, the year of its birth, the number of conflicts has been
dramatically rising. We all need to talk about peace
and to work for it to become real, not just a mere utopia.
Scientists have decided to set an example, but there are many people who,
through the Science for Peace Movement, can let their voice
finally be heard. Because no war will ever stop hope.”*

Umberto Veronesi

EVERYONE HAS THE RIGHT TO LIVE IN A PEACEFUL WORLD. THE TWO MAIN GOALS OF SCIENCE FOR PEACE:

- 1 The diffusion of a culture of peace and the overcoming of tensions among States
- 2 The reduction of military expenditures and of nuclear weapons in favour of major investments in research and development

Since 2009, 4 Task-forces have committed to turning these goals into concrete actions.

Science for Peace was born thanks to an initiative of Umberto Veronesi with the support of 21 Nobel Prize Laureates and eminent personalities of the international scientific, economic and cultural world.
